Defending Health Freedom

TODAY'S ASSAULT ON OUR HEALTH

- Attempts to make illegal or available only by prescription the myriad of natural supplements, to which today we *already enjoy uninhibited access*.
- To make illegal or otherwise unavailable many of the natural healing services and technologies we freely enjoy today and which cause us no harm, as well as yet-to-be discovered natural products and services.
- To forbid the public disclosure of breakthroughs in the treatment of illness and the advancement of wellness using natural products and services.
- To deceptively compromise the standards of organically grown food by redefining "organic" to include the use of the very pesticides, hormones, irradiation, additives, animal abuse and genetically modified foods we care to avoid.
- To condemn us to accept only surgery, radiation and pharmaceutical drugs to make us well, healthy and vibrant.

RON PAUL'S SOLUTIONS AND BELIEFS

- Dr. Ron Paul, M.D., has reintroduced the Health Freedom Protection Act, H.R. 2117, a bill with broad support in the natural health community. "This bill would stop the FDA from censoring truthful claims about the curative, mitigative, or preventative effects of dietary supplements."

"I'm an advocate of a political philosophy that believes social and economic problems should not be solved by passing more laws and using force, but instead, solutions should come through freedom and persuasion." – Ron Paul

- He opposes all forced vaccinations.
- He opposes world government mandates such as the WHO's Codex Alimentarius, which force us to abide by harmful, corporate dictated dietary and health laws.
- He defends our free access to dietary supplements and natural health solutions.

"The FDA, like all federal agencies, ultimately uses its regulatory powers in political ways. Certain industries and companies are rewarded, and others are punished. No regulatory agency is immune from politics, which is why the FDA should not be trusted with power over our intimate health care decisions.

The real issue is not whether supplements really work, or whether FDA drugs really are safe. The real issue is: who decides, the individual or the state? This is the central question in almost every political issue. In free societies, individuals decide what medical treatments or health supplements are appropriate for them."

– Ron Paul

MORE TO KNOW ABOUT RON PAUL

- He will end the war in Iraq and bring all troops home immediately.
- He advocates a non-interventionist foreign policy with "no entangling alliances", and free and open trade within the world community of sovereign nations.
- He opposes any form of Internet taxation and regulation.
- He has never voted to raise taxes. He would end, entirely, the federal income tax and close the IRS.
- He has never voted for an unbalanced budget.
- He has never voted to raise congressional pay nor taken a government-paid junket.
- For twenty years in the House of Representatives he has voted consistently with his spoken beliefs.
- He opposes the subordination of U.S. sovereignty to self-proclaimed world governing agencies and bodies of law such as the UN, WTO, WHO, NAFTA, CAFTA, SPP, GATT, NAU, and others.

"In politics, always opt for freedom. Today, this country is starved for a greater faith in freedom and less dependency on government management of our lives and our medical system." – Ron Paul
